

MatchIndeed API Inventory

Date: April 27, 2026

Base URL: `https://matchindeed.com`

Total active API routes in codebase: `74`

Notes

- This inventory is based on the current Next.js route files under `src/app/api`.
- `Status` in this report means the route is currently present in the codebase and part of the active application surface.
- `Access Level` indicates the expected audience:
 - `Public` : accessible without signed-in user context
 - `User` : intended for authenticated app users
 - `Admin` : intended for admin console users
 - `Coordinator` : intended for coordinator console users
 - `Internal` : cron jobs, maintenance, or system integrations
 - `Webhook` : provider callback endpoint

Public / Core

API URL	PURPOSE	ACCESS LEVEL	STATUS
/api/agreements	Terms or rules acknowledgement data	Public	Active
/api/auth/forgot-password	Start password reset flow	Public	Active
/api/auth/provision	Auth/session provisioning helper	Public	Active
/api/auth/register	New account registration	Public	Active
/api/auth/resent-verification	Resend email verification	Public	Active
/api/fingerprint	Device or browser fingerprint support	Public	Active
/api/geo	Geo lookup for user experience or policy logic	Public	Active
/api/health	Application health check endpoint	Public	Active
/api/subscription-pricing	Public subscription pricing payload	Public	Active
/api/support	Support/contact form handling	Public	Active

Discovery / User Engagement

API URL	PURPOSE	ACCESS LEVEL	STATUS
/api/activities	Activity feed or engagement tracking	User	Active
/api/calendar	Calendar slot create/read/update flow	User	Active
/api/lifecycle/profile-progress	Onboarding/profile completion state	User	Active
/api/matches	Match discovery and match records	User	Active
/api/messages	User messaging and conversation actions	User	Active
/api/notifications	Notification list and notification state	User	Active
/api/photo/upload	Photo upload pipeline	User	Active
/api/reports	User reporting and complaint submission	User	Active
/api/top-picks	Top picks recommendation feed	User	Active

Profile / Account

API URL	PURPOSE	ACCESS LEVEL	STATUS
/api/profile/account	Account profile details and updates	User	Active
/api/profile/block	Block or unblock another user	User	Active
/api/profile/block/ids	Fetch blocked user IDs	User	Active
/api/profile/block-ed-locations	Manage blocked locations/preferences	User	Active
/api/profile/heartbeat	Presence/session heartbeat updates	User	Active
/api/profile/notification-preferences	Notification preference settings	User	Active
/api/profile/reactivate	Start account reactivation flow	User	Active
/api/profile/reactivate/respond	Submit reactivation response/action	User	Active
/api/profile/view	View user profile data	User	Active
/api/profile/visibility	Manage profile visibility state	User	Active
/api/reactivation/send-notification	Send reactivation-related notifications	Internal	Active

Meetings / Host Operations

API URL	PURPOSE	ACCESS LEVEL	STATUS
/api/meetings	Create/list meeting records and requests	User	Active
/api/meetings/acknowledge-rules	Save meeting rules acknowledgement	User	Active
/api/meetings/availability	Meeting availability checks	User	Active
/api/meetings/cancel	Cancel scheduled/requested meetings	User	Active
/api/meetings/finalize	Finalize meeting state transition	User	Active
/api/meetings/notifications	Meeting-related notifications	User	Active
/api/meetings/notifications/schedule	Schedule reminder notifications	Internal	Active
/api/meetings/response	Accept or decline meeting requests	User	Active
/api/meetings/video-link	Fetch or validate meeting video link	User	Active
/api/host/meetings	Host-facing meeting management	User	Active
/api/host/report	Host/coordinator meeting report submission	User	Active

Payments / Wallet / Subscription

API URL	PURPOSE	ACCESS LEVEL	STATUS
/api/add-credits	Add user meeting credits	User	Active
/api/correct-wallet-balance	Wallet correction/repair utility	Internal	Active
/api/create-checkout-session	Start Stripe checkout session	User	Active
/api/use-wallet-balance	Apply wallet balance toward payment	User	Active
/api/verify-payment	Verify completed payment status	User	Active
/api/verify-subscription	Verify subscription activation/result	User	Active
/api/webhook/stripe	Stripe webhook receiver	Webhook	Active

Admin APIs

API URL	PURPOSE	ACCESS LEVEL	STATUS
/api/admin/activity-limits	Manage per-tier activity rate limits	Admin	Active
/api/admin/analytics	Admin analytics dashboard data	Admin	Active
/api/admin/coordinators	Coordinator listing and management	Admin	Active
/api/admin/meetings	Admin meeting list and management	Admin	Active
/api/admin/meetings/approve	Approve meetings and related readiness flow	Admin	Active
/api/admin/meetings/coordinator	Assign or remove coordinator from meeting	Admin	Active
/api/admin/meetings/reschedule	Admin reschedule action	Admin	Active
/api/admin/meetings/resolve	Post-meeting review or dispute resolution	Admin	Active
/api/admin/mfa/recovery-code	Admin 2FA recovery code management	Admin	Active
/api/admin/mfa/recovery-code/verify	Admin recovery-code sign-in verification	Admin	Active
/api/admin/permissions	Admin/sub-admin permission configuration	Admin	Active
/api/admin/permissions/me	Current admin effective permissions	Admin	Active
/api/admin/test-integrations	Integration diagnostics or checks	Admin	Active
/api/admin/user-actions	Admin user actions such as suspend/ban/update	Admin	Active

API URL	PURPOSE	ACCESS LEVEL	STATUS
/api/admin/user-profile	Admin user profile inspection/update	Admin	Active
/api/admin/wallet	Admin wallet management tools	Admin	Active

Coordinator APIs

API URL	PURPOSE	ACCESS LEVEL	STATUS
/api/coordinator/access	Validate coordinator access state	Coordinator	Active
/api/coordinator/meetings	Assigned coordinator meeting list	Coordinator	Active
/api/coordinator/mfa/recovery-code	Coordinator 2FA recovery code management	Coordinator	Active
/api/coordinator/mfa/recovery-code/verify	Coordinator recovery-code sign-in verification	Coordinator	Active
/api/coordinator/permissions	Current coordinator effective permissions	Coordinator	Active

Cron / Integrations / Internal Operations

API URL	PURPOSE	ACCESS LEVEL	STATUS
/api/cron/credits-reset	Scheduled credit reset job	Internal	Active
/api/cron/meeting-notifications	Scheduled meeting reminders and alerts	Internal	Active
/api/cron/reactivation-auto-approve	Automated reactivation workflow	Internal	Active
/api/integrations/onesignal	OneSignal integration endpoint	Internal	Active
/api/test-email	Email delivery test endpoint	Internal	Active

Summary by Access Level

ACCESS LEVEL	COUNT
Public	10
User	34
Admin	16
Coordinator	5
Internal	8
Webhook	1
Total	**74**
